Risk characteristics of Fund’s assets

Bank deposits

A bank deposit, as an asset class, includes bank’s credit risk and repricing risk at maturity. Repricing risk implies a decrease in interest rate when the deposit is rolled-over with the same maturity.

Government Bonds and Treasury Bills

These assets are issued by the Government, agencies or government sponsored enterprises (GSE). However, governments do not fully guarantee the interest payment or the principal. Government bonds and T-bills are subject to interest rate risk and have different credit ratings. T-bills have higher interest rate risk than bonds with the same maturity.

On March 21, 2025, the international agency “Standard & Poor’s” improved Albania’s rating to ‘BB’ with a “stable” outlook, from the ‘BB-’ previous rating published on March 2024. Additionally, the international rating agency “Moody’s” reaffirm its “Ba3 – stable” rating on the 8th October 2025. The increase in the credit rating for Albania, decreases the credit risk of the Fund’s assets, given that the Fund’s assets are invested in financial instruments issued by the Albanian state.

Costs and Fees

The Fund’s Administration commission is charged to the Fund’s assets. The fees charged to the Fund starting from August 1, 2025 are as follows:

Entry Fee:	0%
Exit Fee:	0%
Annual commission:	Management Fee 1.2% of Net Asset Value per annum
Other ongoing fees:	According to the Prospectus, Section 18
<i>The management fee and all other costs listed in an accounting year will in no case exceed a maximum of 1.5% of the fund's net asset value.</i>
